

**Job Description:** Research Associate/Analyst: Medical Communications

**Summary**

Analytica International, a dynamic and entrepreneurial research based consultancy, is seeking part-time and full-time candidates to join its Medical Communications team within the Global Health Economic and Pricing group. In this role, the candidate will support project teams and undertake tasks relevant to both health economics and pricing/market access disciplines. Key responsibilities will include the review, synthesis, and communication of qualitative and quantitative research in a variety of formats and contexts, in order enable strategic decision-making at all phases of product development and launch.

**Responsibilities**

Overall, assist with project design, execution, and deliverable development for varied stakeholders and audiences within the global pharmaceutical and biotechnology industry.

Candidates will take on the following responsibilities:

- Summarize and synthesize a wide range of medical and statistical information, including disease-specific and pharmaceutical product research
- Interpret and communicate the results of health economic models (cost-effectiveness and budget impact) and statistical analyses
- Perform literature reviews and undertake secondary research initiatives including the retrieval and analysis of data, competitive product pipeline information, epidemiology trends, etc.
- Develop health related communication projects, including:
  - Drug Dossiers (Global and Academy of Managed Care Pharmacy format)
  - Abstracts
  - Manuscripts for peer-reviewed journals
  - Poster presentations
  - PowerPoint presentations
  - Technical reports on health outcomes and epidemiological studies
  - Internal documents and reports

**Requirements**

**Education & Experience**

- Minimum Bachelor's degree with an emphasis in medical communications, general communications, English, journalism, or other relevant area
- 1 to 2 years of professional experience, preferably in medical communications or a related field
- Interest in and/or understanding of public health, health sciences, biostatistics, research methods, epidemiology, economic modeling, and/or healthcare/pharmaceutical industry

**Skills**

- Excellent written and oral communication and interpersonal skills
- Strong multi-tasking and organizational abilities
- Sense of urgency necessary to meet objectives and deadlines
- Demonstrated leadership abilities, accountability, and initiative
- Proficiency in Microsoft Office (PowerPoint, Excel, Word)
